

Sommerfeld Theory Colloquium

Prof. Sasha Polyakov

Princeton University

The structures beyond space-time

I will discuss the connections between gauge fields, strings and quantum geometry. It will be stressed that in a certain sense, quantum gravity simplifies the theory. Some applications of these concepts to “normal physics” will be mentioned.

Wednesday, 19th July 06, 11.15 h , Room 348 / 349, Theresienstr. 37 / III
