

Sommerfeld Theory Colloquium

Prof. Ulf Danielsson

Uppsala University

Dark bubbles and black shells – the darkest corners of the universe in a new light

Understanding dark energy and black holes remain a great challenge to fundamental physics. In this talk I will review the difficulties and explore some new and speculative approaches.

Wednesday, 16 October 2024, 16:15h, Room A348, Theresienstr. 37/III

Prof. Slava Mukhanov
